

CITY OF MIAMI BEACH

ANNOUNCEMENT OF UNCLASSIFIED POSITION

CITY ENGINEER

\$73,457 - \$118,638 ANNUALLY

Starting salary up to \$90,000

DESCRIPTION OF DUTIES: This is highly responsible professional work involving the coordination of all City engineering activities. The City Engineer will be responsible for organizing, planning, directing and supervising the work of a team of professional engineering, technical and administrative personnel involved in the preparation and review of plans, specifications, and contracts for various public works projects. Provides technical oversight for construction projects and serves as design consultant for the City. This position reports to the Director of Public Works.

ILLUSTRATIVE EXAMPLES OF WORK PERFORMED INCLUDE, BUT ARE NOT LIMITED TO: Supervises the planning and design of complex public works projects; estimates quantities and cost of such projects; analyses conflicting design requirements and approves changes. Plans, organizes, directs and is responsible for the performance of the engineering, right-of-way and surveying functions. Plans, directs and coordinates the inspection of construction projects to ensure compliance with engineering plans, contracts, specifications and City Code. Prepares construction estimates for proposed City projects and supervises construction project managers. Directs the preparation and submission of grant applications and serves as grant administrator for grant funded programs. Interprets and defines specifications, ordinances and codes. Advises City departments on matters relating to engineering and construction projects. Develops and supervises the Engineering Division operating budget. Develops and coordinates activities for capital budget projects. Acts as Engineer of Record responsible for signing and sealing drawings for all City projects designed in house by Engineering Division and Public Works Department

REQUIREMENTS: Graduation from a college or university accredited by the American Board of Engineering Technology (ABET) with a degree in Civil Engineering or a related field. Current Florida Professional Engineer (P.E.) registration, as issued by the State of Florida Board of Professional Engineers. Ten years experience as a professional engineer in a county or municipal government that includes planning, design and design review, four years of which must have been in a supervisory capacity.

DESIRES: The ideal candidate would have significant experience in designing water, sewer and stormwater system; thorough knowledge and experience of Right-of-Way Management programs; and knowledge and experience in the development and operation of a GIS system.
